Subject: RE: Flood Control Channel

Thanks, AJ. Simply to clarify only, this is for the 4th District, not 3rd – just didn't want there to be any confusion moving forward.

Thanks again.

FYI,
Please see response to 3rd District, they request updates almost weekly? [REDACTED]

Thanks,

AJ Jaime

Hi Natalie,

If you would like we can forward you our crews bi-weekly schedule on channels we intend to complete maintenance? We routinely communicate and update Susan on important issues taking place in our channels. She's been very involved and has visited many of our hot spot locations and understand the issues we're facing.

One update that may be of interest to Supervisor Nelson is the first location he visited on our tour along the Santa Ana River just north of Katella. All maintenance work that the Supervisor requested during our tour will be completed by next week, please see attached before and after photos.

Thanks,

AJ Jaime

Hi Natalie,

My direct Manager AJ Jaime has been working continuously to address the issues reported in our channels as well as our routine cleanup locations. I am not sure about communication with Susan Price as she contacts him directly to discuss various items. I have included him in this email to see if he could assist with any updates.

Hi AJ,

Natalie with Supervisor Nelson's office is requesting any updates we have on our flood channels can you please see her questions below and assist with any updates you may have?

Thank you,

Joe Villa

Hi Joe-

Do you have any updates I can provide our constituents regarding the OC Flood Channels? Also, has your department been in contact with Susan Price recently? Thank you, I appreciate your help.
